

# NATURE'S ORGANICS BOTTLE EARRINGS

# NATURE'S ORGANICS BOTTLE EARRINGS

Unbottle your creativity and create upcycled earrings!

## MATERIALS

- clean plastic bottle
- 1 pair of earring hooks
- jump rings

## TOOLS

- needle nose pliers
- 1/16" hole punch
- scissors
- pen/marker
- paper

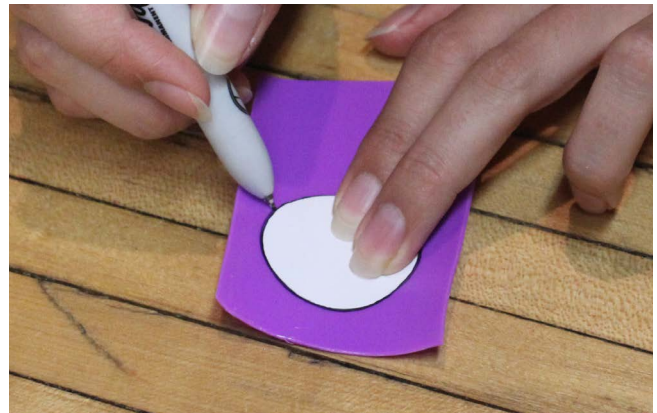

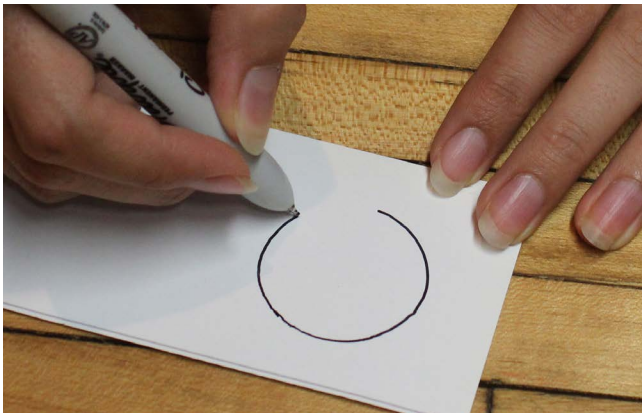

## START!

**STEP 1** Cut open the plastic bottle and wash out any remaining debris. Cut out a panel for your earrings. **TIP:** roll the bottle in the opposite direction to help it to lay flat.

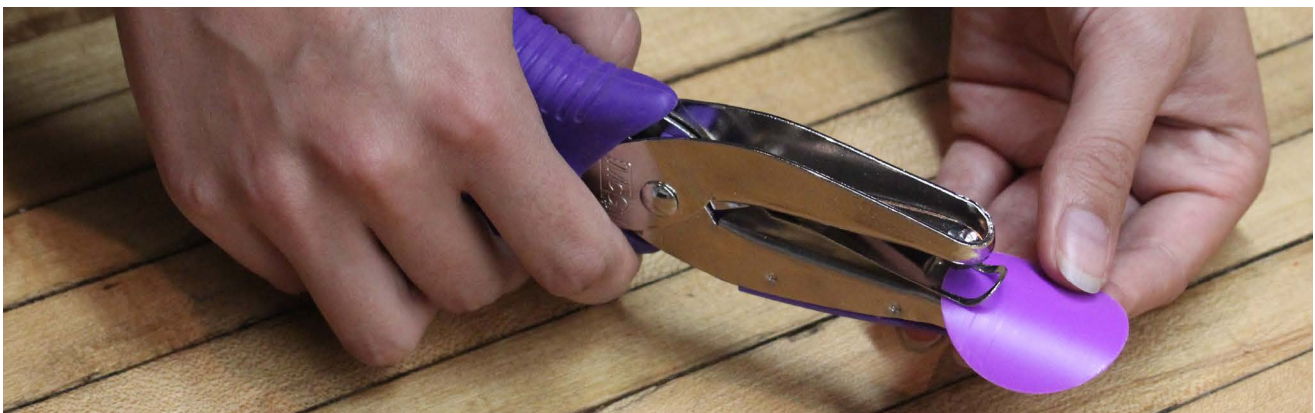

## STEP 2

Make a template on paper for the shape you'd like the earrings to be. Trace your template onto the tube and cut out the pieces. Use your creativity, any shape, or multiples of shapes to create layers.

## STEP 3

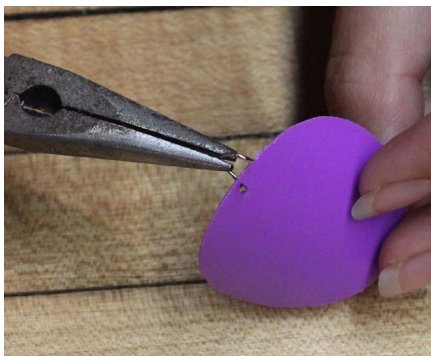

Use the hole punch and punch small holes near the top of each of your precut shapes.

## STEP 4

Open a jump ring a small amount with the needle nose pliers and loop it through the holes. If you have multiple pieces, layer them on top of each other, and close jump ring.

## STEP 5

Take a second jump ring and loop it through the first ring with the attached shapes and then through an earring hook.

## STEP 6

Repeat for the second earring and, voila! A new pair of earrings!
