TERRACYCLE JOINS THE SUPPLIERS PARTNERSHIP FOR THE ENVIRONMENT

Innovative Recycling Company TerraCycle® Joins Collaboration between Automakers, Suppliers and the US EPA

INDIANAPOLIS, Indiana (April 24, 2019) – TerraCycle, a New Jersey-based, international recycling company that specializes in recycling the unrecyclable has announced its admittance into the Suppliers Partnership for the Environment (SP). TerraCycle will be joining the organization at the Supplier Partnership’s 2nd Quarter Meeting of 2019 which is being held April 23-24 at [Heritage Group’s corporate campus](#) in Indianapolis, IN.

The Suppliers Partnership was established with the purpose of advancing environmental sustainability through the automotive supply chain. SP functions as a forum for global automotive manufacturers, their large and small suppliers, the US EPA and other government entities from around the world to meet and address focus issues. These include: biodiversity preservation, energy-efficiency, health, safety, water usage, and the use of both eco-friendly materials and environmentally-sound supply chain management. Membership is open to companies that supply goods or services to an automotive manufacturer or parts supplier.

“We’re proud to welcome TerraCycle to the Supplier Partnership. TerraCycle is a business with an Earth-friendly mission that dovetails nicely with the Suppliers Partnership’s sustainability initiatives,” said Kellen Mahoney, Program Director of the Suppliers Partnership for the Environment. “We look forward to working with TerraCycle to find new, innovative ways to further preserve our natural resources.”

SP membership not only helps companies meet their economic goals by facilitating a collaborative working relationship between the private and public sectors but also aids them in achieving their ambition of environmental preservation. The engagement of the US EPA makes this collaboration even more unique since members are provided with topics for special projects, information, approaches, and tools to realize common environmental objectives.

This forum and common purpose allows SP to continually identify new, innovative, and more environmentally sustainable ways to enhance the competitiveness of the automobile industry through the global supply chain. Recently, this purpose was demonstrated when SP participated in the US Workshop of the G7 Alliance on Resource Efficiency that was hosted by US EPA.

About The Suppliers Partnership for The Environment

The Suppliers Partnership for the Environment (SP) is an association of automakers and their suppliers working in collaboration with the US EPA and other governmental entities to identify

and implement creative projects and programs that will advance environmental sustainability while providing economic value to the automotive supply chain through strategic action and engagement.

About TerraCycle

TerraCycle is an innovative waste management company with a mission to eliminate the idea of waste®. Operating nationally across 21 countries, TerraCycle partners with leading consumer product companies, retailers, cities, and facilities to recycle products and packages, from dirty diapers to cigarette butts, that would otherwise end up being landfilled or incinerated. In addition, TerraCycle works with leading consumer product companies to integrate hard to recycle waste streams, such as ocean plastic, into their products and packaging. TerraCycle has won over 200 awards for sustainability and has donated over \$44 million to schools and charities since its founding 15 years ago. To learn more about TerraCycle or get involved in its recycling programs, please visit www.terracycle.com.
