CAPRI SUN HALLOWEEN MASK

Mask your fear on Halloween this year!

MATERIALS

- One Capri Sun pouch
- Length of elastic cord

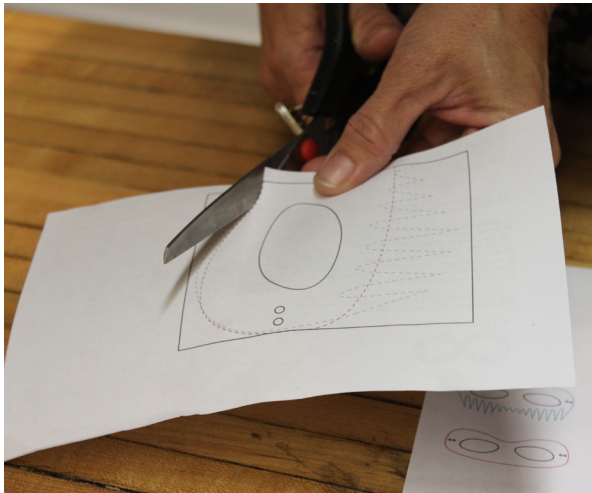

TOOLS

- Template
- Pen or Marker
- Scissor
- Thumb tack or 1/8" hole punch
- Tape

START!

STEP 1 Cut off the top of your Capri Sun Pouch, and clean out the insides thoroughly with soap and water. Remove as little material as possible when cutting the top.

STEP 2

Print and cut out your template, preferably on cardstock.

STEP 3

Use the tape to temporarily attach your template to the Capri Sun Pouch.

PRO TIP:

Use a piece of tape to reinforce the hole you make to prevent the pouch from tearing!

STEP 5

Use a 1/8th inch hole punch or a thumb tack to make the two holes. If you are using the thumb tack method, you will need to wiggle the tack around in the hole it makes to stretch it.

STEP 4

Cut out your desired mask shape using the pre-designed green or red style, or cut your own wacky shape! Just make sure to cut the eye holes in the correct space indicated.

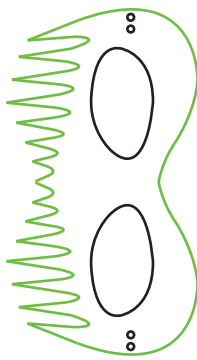

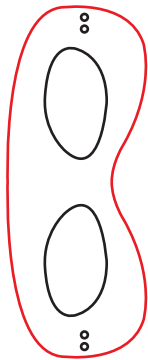

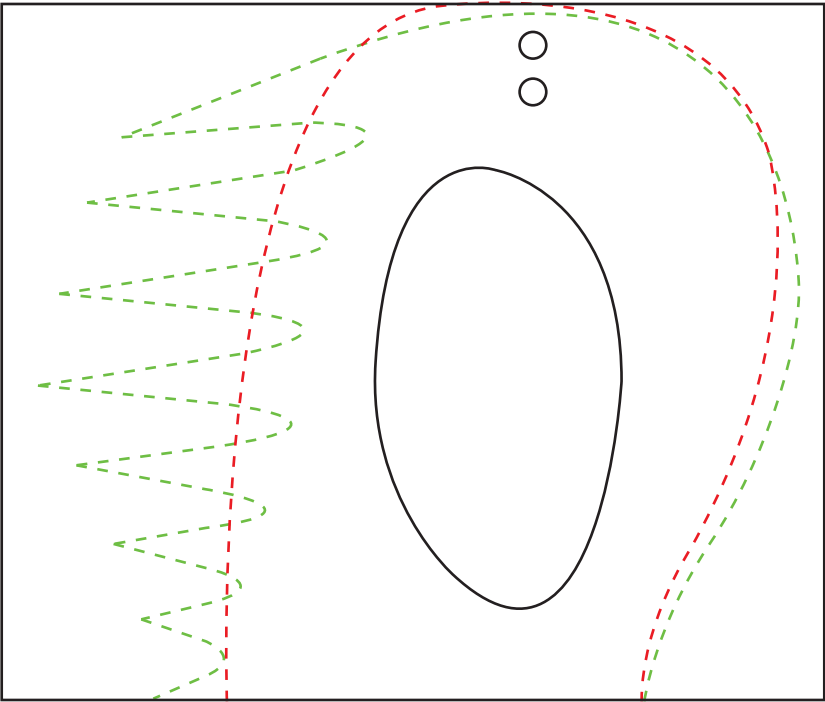

STEP 6

Cut a length of elastic around 15 inches long, loop it through the holes you made and tie them into a knot.
